This class provides a basic behavioral foundation for your puppy to practice proper behavior as you gain training knowledge that can be fine-tuned and increased in complexity as your dog ages.

## You will learn:

- Appropriate puppy play and social behavior
- How to re-direct unwanted behavior
- How to reinforce good social behavior
- How to settle an over-aroused puppy
- How to manage your puppy during distractions
- Safe socialization with opportunities for real-life practice

The classes will be taught by:  
**Francesca Alonzo**

The initial class will begin with: house management - how to set up a safe home, use baby gates and introduce proper toys. The class will expand to address isolation distress (aka separation anxiety), preparing for a first grooming experience and resource guarding (where the puppy growls, bites, or lunges at a person or dog over food or toys).

Positive reinforcement and a light, fun approach will guide your puppy to confident, calm behavior while building bonds with you by introducing new sounds, touches, and surprises.
